

KARUISHI™

‘Warmth for a life well-lived.’

輕量

LIGHTNESS

Maintains high volume with perfect 2-layer knitting structure.

保温

WARMTH

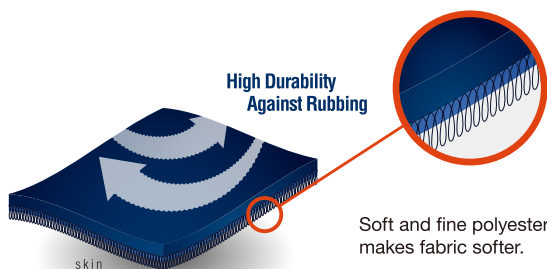

Brushed fabric delivers high heat insulation.

Anti-pilling property from using filament yarns. High abrasion resistance from special knitting techniques.

耐磨性

DURABILITY

LIGHT, WARM AND DURABLE — HIGH-VOLUME KNITTED FABRIC

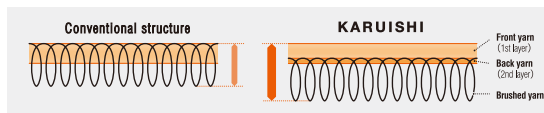

High Durability
Against Rubbing

Soft and fine polyester makes fabric softer.

Special brushed fabrication traps warm air inside the fabric.

CROSS-SECTION SURFACE

- Brushed yarn only connected to back yarn creates high volume and uncanny lightness.
- This technique results in greater abrasion resistance than conventional spun or other brushed filament materials.
- High volume with perfect 2-layer structure.
