

Dermizax™

Waterproof Breathable Fabric

Polyester version

The Dermizax™ Polyester Version uses a polyester film made from polyester resin. By combining this film with a polyester face fabric, we can create a product that is fully recyclable, while maintaining the waterproofness, breathability, and the stretch of the fabric.

Dermizax™

Waterproof Breathable Fabric

Bio-Based version

At the Toray Group, we consider sustainability to be the most important global issue of the 21st century. Based on this idea, we developed Dermizax™ Bio-based version. This version uses about 30-50% bio-based membrane while still maintaining waterproofness, breathability and soft handfeel of Dermizax™.
