

# Dermizax™

Waterproof Breathable Fabric

## New Hybrid version

The Dermizax™ New Hybrid Version is a series made for activities which demand high water pressure resistance, such as Marine or Fishing. In addition, it features not only PFC-free DWR, but also a non-fluorinated film. This series is one of the most water resistant of all.

# Dermizax™

Waterproof Breathable Fabric

## High-Durability Microporous version

Designed with specially developed durable polyurethane membrane, this version of Dermizax™ delivers direct moisture ventilation with perfect waterproofness with durability against deterioration, maintaining softness and stretch of our Dermizax™.
