

Primeflex™

Stretch Fabric

MICROFIBER VERSION

Toray Primeflex™ features a bi-component cross-sectional structure that bonds two separate polymers with different characteristics. Its high stretchability and soft handfeel provide excellent wearing comfort, which makes Primeflex™ a versatile stretch fabric suitable for a variety of applications.

Newly developed Microfiber version uses Toray original NANODESIGN TECHNOLOGY which enable Primeflex™ to achieve even more delicate and gentle touch of microfiber while keeping comfort stretch, good stretch recovery and quick dry function of Primeflex™.
